PROFILE

I'm Mout, 23 years old and studying Information Management at the Catholic University of Leuven after obtaining a bachelors degree in applied computer sciences. Besides programming, I'm really passionate about photography, videography and graphic design. In 2022, I created my company Mout Pessemier Studios (MPS for short), offering those services.

EXTRACURRICULAR ACTIVITIES

Student Innovations vzw
Student Innovations is a non-profit run by students that created an app called Quivr, that aids students around Flanders in their day to day life. I've been a part of Student Innovations since May 7th 2021. I joined as a fronted developer and as part of the design team. With my knowledge of coding in combination with my interest for UI/UX and design, I formed the bridge between the frontend team and the design team, combining my two interests.

As of Februari 2022, I decided to focus on my passion for design and dedicated my time primarily to the design team.

Since the first of July, I became head of the design department and vice-president. During my final masters year, I will continue to help steer the direction of Quivr!

Mout Pessemier Studios
I've always had a passion for photography and videography. That's why in the summer of 2022, I started my own company about these topics along with graphical design.

Since the start-up, I've done several paid shoots and projects of my own to gather more experience in the field of videography, graphics and video editing.

My dream is to turn this passion into a full-time profession. Travel the world, take amazing pictures, make creative designs and great videos.
